

Ambu® Cardiology Sensors

Leading innovator of ECG electrodes providing a unique offering of superior quality and cost effective solutions

Ambu[®] electrodes

- quality in every aspect

Pioneering and innovation for more than 4 decades

Through 40 years of experience with developing and optimizing ECG electrodes Ambu® has become the epitome of superior reliability and convenience in every situation.

Since our engineers developed the offsetconnector 4 decades ago, we have continuously worked to optimize our products with unique features based on insight gained through tight collaboration with users from all over the world.

Comprehensive range - Cost effective use

Electrodes need to be easy to use without extensive preparation. They must be equipped with features that ensure maximum patient comfort and ease of use – without compromising absolute reliability and signal quality. In this sense optimally designed electrodes are devices that can secure efficient workflows.

Over time we have gained invaluable experience and understanding which has made us capable of creating the most comprehensive range of electrodes. Each one developed to match every usage situation with particular focus on accommodating the need for cost-effective solutions in all aspects.

Highly refined manufacturing processes and comprehensive quality controls ensure the Ambu® electrode quality.

Xtreme Everest project, a research mission to find the underlying physiological reasons why some people cope better with low oxygen conditions than others.

BlueSensor WhiteSensor

- the world's most time and cost efficient electrode

40 years of experience makes a difference

BlueSensor is the world's most time and cost efficient range of electrodes that delivers unmatched readings, user convenience and patient comfort.

BlueSensor ensures that you don't get your workflow disrupted by false alarms or have to waste time resolving problems with electrode adhesion.

Exact monitoring - clear picture

The electrodes give a fast and reliable trace without the need for skin preparation, maximizing comfort for the patient. We know that fast, exact monitoring that ensures a clear picture of the patients' heartbeat is essential to accurate diagnoses.*

BlueSensor electrodes will give you exactly that - an absolute quality experience.

The versatile and reliable range of Ambu electrodes

Functionality you can trust

Responding to the growing demands of standard solutions to cover a broader range of applications, WhiteSensor has been developed as a range of electrodes that unites versatility with the well-known Ambu quality and functionality. The wide range of sizes, shapes, gel types and backing materials makes it easy to choose the optimal device for every situation.

Covers all patients needs in monitoring

The WhiteSensor range is comprised of electrodes equipped with carefully selected features to match each individual situation, in total covering all patient needs in monitoring. We have chosen flexible and reliable materials and adhesives, able to follow skin movements without lifting off, to accommodate both patient comfort and signal quality.

Gel Type

Radiolucent

Benefits

Occlusive backing

Breathable backing

Ambu is constantly working to improve user experience and convenience. We have added icons to the packaging for quick guidance and simple selection - making your everyday easier.

BlueSensor key features

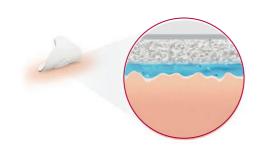

Offset connector

- Allows movement of the connected cable without affecting the electrode's performance.
- The offset connector prevents artifacts from disturbing the readout. Especially in demanding situations like stress test and Holter.*
- Easy attachment provides a high level of comfort for the patient and convenience for the user.

Double ring adhesive

- The two rings secure optimal fixture and precise
- The outer ring is for long-term wear, as adhesion increases with time. The thin and soft material allows the skin to breathe.
- The inner ring on the polymer material "seals" the gel area and ensures an immediate, excellent adhesion.
- Unique construction allows mounting without skin preparation and comfortable removal of the electrodes

Wet gel

- Wet gel optimizes contact between skin and
- Lowering skin impedance effectively and immediately.
- Exact volume of wet gel is key to securing the best possible signal.

Ag/AgCl electrode

- Pure silver filament in contrast to carbon/silver
- Ensures excellent trace quality due to optimized conversion of the signal from biological to electrical

*Knight BP, Pelosi F, Michaud GF, Strickberger SA, Morady F. Clinical consequences of electrocardiographic artifact mimicking ventricular tachycardia. New England Journal of Medicine (1999) 341(17):1270-4.

Resting ECG/12-lead ECG

Ambu offers a complete range of electrodes for ECG resting procedures, to meet all hospital needs.

Benefits:

- Excellent trace quality
- Ensuring an accurate diagnosis with a clear and reliable signal.
- Superior adhesion
- For fast and secure recordings.

BlueSensor SU-oo-A

Features and Benefits:

- Highly conductive wet gel ensures reliable traces
- Superior quick adhesion saves time
- Unique offset connector is easy to connect
 fitting or tab
- Occlusive backing material is resistant to fluids
- High-quality Ag/AgCl sensor ensures excellent trace quality

BlueSensor SU-oo-F

Size: 49 x 33 mm 24 months shelf life PVC free

BlueSensor SU-oo-C

BlueSensor 2300

Size: 34 x 23 mm 24 months shelf life PVC free

Features and Benefits:

- Skin friendly solid gel ensures reliable recordings
- Convenient in size can be used on most patients
- Occlusive backing material is resistant to fluids
- Radiolucent and MR Conditional can remain on the patient during X-ray and MRI procedures

Quantity/pouch	100
	Quantity per inner/outer box
BS-Tab-2300/100	500/5000

WhiteSensor 4530M

3 mm fitting connector

WhiteSensor 4540/4540M

4 mm fitting connector

Size: 32 x 45 mm

24 months shelf life

PVC free (in contact with skin)

Features and Benefits:

- Highly conductive wet gel immediate reliable recordings
- Comfortable foam backing resistant to fluids
- 3 or 4 mm fitting connector direct connection to cable, without adapters
- Radiolucent and MR Conditional can remain on the patient during X-ray and MRI procedures
- Tab for placement and removal ensures ease of use
- Convenient presentation of 5 pieces/strip for fast application

Quantity/pouch	60
	Quantity per inner/outer box
4540/4540M	300/2400
4530M	300/2400

WhiteSensor

WhiteSensor o615M

Centre tab and functional shape Size: 26 x 37 mm

Features and Benefits:

- Centre tab connection and functional shape for superior adhesion
- Skin friendly conductive adhesive ensures reliable recordings
- Medium size can be used on most patients
- Radiolucent and MR Conditional can remain on the patient during X-ray and MRI procedures
- Tab for placement and removal ensures ease of use
- Convenient presentation of 10 pieces/strip for fast application

WhiteSensor 0215M

Very small size: 13 x 34 mm

WhiteSensor 0315M

Small size: 21 x 35 mm

- Skin friendly conductive adhesive ensures reliable recordings
- Fish tail tab design reduces electrode lift-offs for secure adhesion
- Radiolucent and MR Conditional can remain on the patient during X-ray and MRI procedures
- Various sizes to meet specific patient needs
- Convenient presentation of 10 pieces/strip for fast application

WhiteSensor 0415M

Medium size: 23 x 34 mm

WhiteSensor 0715M

Large size: 26 x 34 mm

24 months shelf life PVC free

0715M	500/5000		

Holter, Event Recording and Long-term Monitoring

Benefits:

- Excellent trace quality Ensuring an accurate diagnosis with a clear and reliable signal.
- Superior adhesion To prevent repetitive tests and false alarms that may be due to

electrodes attachment.

Skin care

Hypoallergenic materials to minimize the risk for skin reactions.

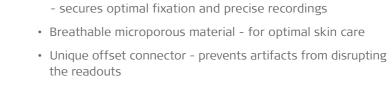

The correct placement of electrodes is typically determined by the hospital/physician and/or local protocol/procedures lmages in this catalogue are not meant as placement guidance.

Size: 68.2 x 55 mm 24 months shelf life

BlueSensor VLC

BlueSensor L

• Highly conductive wet gel - ensures reliable traces • Combination of instant and long-term adhesives

Features and Benefits:

Accessories

SkinFix

Size 59 x 55 mm

Features and Benefits:

- Fixes electrode leadwires on patients during Holter and Stress test
- Reduces movement artefacts on the ECG
- Minimizes the risk of electrodes falling off
- Breathable microporous material
- The wire strap can be reopened and closed several times
- Moisture resistant
- MR safe

The correct placement of electrodes is typically determined by the hospital/physician and/or local protocol/procedures. Images in this catalogue are not meant as placement guidance.

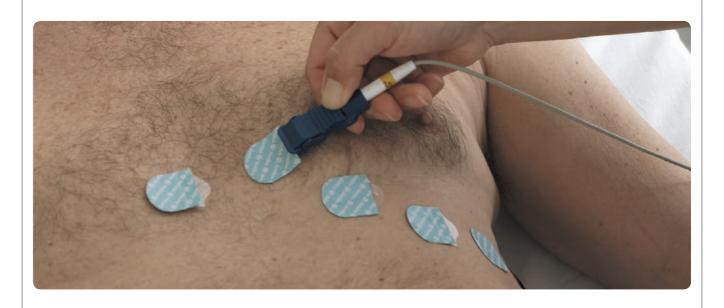

Snap Clip

Clip connector for tab electrodes Ref: 0334M

Features and Benefits:

- Connects 3 mm pin cables to tab electrodes
- Ensures secure connection
- Easy to use

PVC free Reusable Packaging (pcs per pouch/carton): 10/1000

Skin Prep

Ref: 2121M

Size: 19 x 28 mm PVC free

Features and Benefits:

- Allows skin preparation before electrode placement
- Abrasive to reduce skin impedance
- Adhesive on one side, to use with one finger
- Small size fits finger tip

Packaging (pcs per pouch/inner box/carton): 500/1500/15000

Ambu Profile

Since 1937, breakthrough ideas have fuelled our work on bringing efficient healthcare solutions to life. This is what we create within our fields of excellence – Anaesthesia, Patient Monitoring & Diagnostics, and Emergency Care.

Millions of patients and healthcare professionals worldwide depend on the functionality and performance of our products. We are dedicated to improve patient safety and determined to advance single-use devices.

Ideas that work for life

The manifestations of our efforts range from early inventions like the Ambu bag and the legendary Blue Sensor® electrodes to our newest landmark solutions like the aScope $^{\infty}$ – the world's first single-use flexible video scope.

Our commitment to bring new ideas and superior service to our customers has made Ambu one of the most recognized medical companies in the world.

Ambu worldwide

Headquartered near Copenhagen in Denmark, Ambu employs approximately 2,250 people in Europe, North America and the Asia Pacific.
