

THE NEXT GENERATION OF RADIAL

A full suite of configurations
and custom options

Advanced hydrophilic
technology designed
for optimal insertion
and removal

Enhanced kink
resistance for optimal
procedural reliability

Prelude **EASE**[™]

Hydrophilic Sheath Introducer

RADIAL BENEFITS

The well-known benefits of the radial approach include less bleeding complications, quicker ambulation, and decreased procedure cost.¹ Merit Medical is introducing a new line of **HYDROPHILIC** sheath introducers for radial access, the **PreludeEASE**. Studies show that hydrophilic coating on sheath introducers can reduce the incidence of arterial spasm during radial procedures and also reduce the amount of force required to insert and remove a radial sheath introducer.¹

The PreludeEASE Hydrophilic Sheath Introducers, combined with a variety of radial products, accessories, and custom kit configurations, provide you with the options you need to **ACHIEVE RADIAL ACCESS WITH EASE.™**

ENHANCED SHEATH PERFORMANCE

The PreludeEASE maintains a robust design that resists kinking while still providing a large inner diameter. With a slim profile and large inner diameter for increased device compatibility, the PreludeEASE provides optimal dimensions without compromising integrity or performance.

RADIAL SOLUTIONS

Sheaths Available in 4F-7F Smaller sizes for patients with smaller radial arteries. Larger sizes also available to facilitate both diagnostic and interventional procedures.

Hydrophilic Coating The PreludeEASE sheath is hydrophilic coated to the tip. Hydrophilic coating facilitates easier insertion and removal as well as patient comfort.²

Excellent Transitions For smooth and easy insertion leading to patient comfort.

Insertion Force 30% less than leading competitor.³

Achieve Radial Access with Ease™

RADIAL KIT COMPONENTS

Merit Advance® Needle

Short bevel needle with bevel indicator on hub, along with a proprietary coating helps to ensure smooth insertion. A straightforward, accurate single puncture with a metal needle can help lower the risk of spasm.⁴

Guide Wire Options

Kits available with stainless steel spring coil, nitinol or stainless steel mandrel, or plastic jacketed guide wires providing options for your clinical practice.

BowTie™ Guide Wire Insertion Device

Included in kits with 0.018" guide wires for easy, efficient alignment of devices with micro guide wires

Two-Part Access Needle

- Thin walled metal cannula
- Flexible, radiopaque catheter
- Smooth catheter-to-needle transition for easy insertion
- Excellent for two-wall access technique
- Up to 17% faster flash back over our leading competitor*
- Up to 17% less insertion force over our leading competitor*
- Visible arrow to help clearly indicate bevel position

OPTIONS

Merit can tailor kits to meet your clinical needs. From setup to hemostasis, Merit Medical offers a complete radial product portfolio to help you achieve the procedural **EFFICIENCY** and **SAFETY** that is essential for delivering the best possible **CARE**.
